

例外處理：自訂 throws – 語法

★ throws 語法

```
public class UsingException {  
    public static void main(String args[]) {  
        ....;  
        try {  
            meth_1();  
            .....;  
            meth_2();  
            .....;  
        }  
        catch ( Exception_1 except1) {  
            System.out.printf("%s\n", except1.getMessage());  
        }  
    }  
    public static void meth_1(..) throws Exception_1 {  
        ...;  
        throw new Exception_1("Message_1");  
        ....;  
    }  
    public static void meth_2(..) throws Exception_1 {  
        ...;  
        throw new Exception_1("Message_2");  
        ....;  
    }  
}
```
